

CEI-112G linea

Our CEI-112G linea is designed to meet the most demanding performance and accuracy requirements for electrical and optical communication systems. CEI-112G linea adds essential elements to enable the most cost-effective solutions.

CEI-112G linea performance will be presented at ECOC. This demonstration showcases the BA-4000-L2, EXFO's combined L1 BER tester and L2 traffic analyzer for 800G DR4/FR4/LR4 and optical engines.
